

## **BEST INDICATOR ADAPTIVE FORECASTING METHOD**

### **ABSTRACT OF THE DISCLOSURE**

5       A Best Indicator Adaptive (BIA) method fuses several singular  
indicators into one composite model to provide a new forecasting combination  
scheme. BIA uses the sizes of the spread of the distribution taking into  
account the variation of the distribution parameters themselves. Underlying  
the BIA method is the common theme and unifying theory of the power of  
quotient and the methods of making use of order composition and sales  
10       opportunities pipeline progression.
